

## High-Intensity Laser Therapy Applications

### DESCRIPTION:

This course has been created to help clinicians elevate the level of care provided for their sleep and TMD patients. It will review why High Intensity Laser Therapy (HILT) with the DEKA Nd:YAG laser not only improves healing and recovery, but also significantly enhances repair and regeneration of compromised structures, including cartilage and bone. Attendees will learn how HILT is more effective than Low Level Laser Therapy (LLLT) using treatment protocols that have been proven to provide quick and painless results as well as how to deliver analgesia and minimize trigger point pain within minutes of application. Clinicians will have the opportunity to gain hands-on experience treating painful areas to see first hand how quickly pain reduction can be achieved. Better outcomes coupled with faster treatment times is now possible due to this technology.

**HOST:** DEKA Dental Lasers

**DATES:** 4/6/2024 7/27/2024

**TIME:** 9am-4pm  
Lunch will be provided.

**LOCATION:** 5005 Rockside Rd, Ste 1225  
Independence, OH 44131

**COST:** \$1,995

CREDITS

### Dr. Kristina Wolf

Dr. Wolf received her Bachelor's degree from Baldwin Wallace University, and then attended Case Western Reserve University and graduated with both an M.S. in Applied Anatomy and a D.M.D from the School of Dental Medicine. She began her career as a general dentist with her own private practice in Pennsylvania. In 2018 she moved back to Cleveland where she could continue her passion of educating, being an adjunct professor at Case Western School of Dental Medicine.

Since her return, she has dedicated her practice exclusively to the treatment of craniofacial pain and sleep related breathing disorders at the TMJ & Sleep Therapy Centre of Cleveland.

Dr. Wolf is now a sought-after lecturer, bringing her wealth of knowledge to both medical and dental professionals. In 2022 she began working with TMJ and Sleep Therapy Centre International and Dr. Steven Olmos to deliver the Sleep Related Breathing Disorders and Craniofacial Pain Mini Residency Program and the Motor Nerve Reflex Testing Program.

She is a diplomate of the American Academy of Dental Sleep Medicine and is passionate to continue advancing the fields of pain and sleep.
